

Proof management commands

[/Reference manual/Z-related commands](#)

These are the remaining commands used in performing proofs. For example, the generation of conjectures, application of tactics, and manipulation of the proof tree.

- *apply tactic*
- *exists conjecture*
- *lift*
- *node in tree*
- *other attempts*
- *play tactic*
- *printed proof*
- *proof tree*
- *prune*
- *record script*
- *script manager*
