

Z-related commands

[/Reference manual](#)

While button 2 is held down, a menu of applicable Z-related commands is displayed. As the mouse moves over the menu, a short description of the effect of the highlighted command appears in the title bar at the top of the window. If a desired command is not displayed, try the *why not* command, or read the documentation of the particular command.

1. Categories of commands

- [Browsing commands](#)
- [In situ replacement commands](#)
- [Proof rule commands](#)

- Decision procedure commands
- Proof management commands
- Refinement commands
- Compliance commands
- Miscellaneous commands

2. All commands alphabetically

- *absorption*
- *alternation*
- *annotation*
- *antecedent intro*
- *apply tactic*
- *assignment*
- *axiom*
- *characterization*
- *code*
