

Decision procedure commands

[/Reference manual/Z-related commands](#)

These commands are *in situ* replacements of formulae by atomic results, e.g. predicates by *true* or *false*. They include facilities for reasoning about numeric formulae.

- *evaluation*
- *heuristic decision*
- *heuristic solution*
- *linear decision*
- *linear solution*
- *model check*
- *model solution*
- *resolution*
