headers for following lib/ libraries  
GUI in terms of X11 used by src/progs/proof  
error routines used by src/progs  
IP address manipulation for cadiz  
IP address manipulation for proof  
regular expressions for proof  
subset of stdio with operations on buffer  
headers for src/lib, src/tools and src/procs/common  
allows a program to run cadiz and send commands to cadiz  
compliance commands  
decision procedure commands  
error routines for cadiz and zpp  
garbage-collected heap  
in-situ replacement commands  
linear lists in heap  
proof management commands  
code common to mark-up preprocessors  
miscellaneous general purpose routines  
prettyprinters  
refinement commands  
miscellaneous commands  
proof rule commands  
browsing commands  
testing commands  
inference routines  
data types specified using peat  
UCS character manipulation  
universal numbers  
high-level interface to proof+troff window
