

Tool directives—tricks specific to cadiz

[/Reference manual](#)

Here is a miscellany of tricks specific to cadiz that are requested by placing directives in the mark-up of the specification. They can be used only between formal paragraphs, not within formal paragraphs.

- [Typesetting paragraphs side-by-side](#)
- [Customizing the typeset appearance of formal paragraphs](#)
- [Typesetting the name CADiZ with fat Z](#)
- [Jumps and knobs—references from informal text](#)
- [Typesetting an index of definitions](#)
- [Quiet mode—disabling typesetting](#)
- [Reckless mode—disabling typechecking](#)
- [Type abbreviations](#)
- [Tame functions](#)
